DETAILED ACTION

1. Claims 1-54 are pending in this application and have been examined.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 1-36 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 1 and 19 contain the passage: "...receiving a communication that is authenticated from a server at the KDC..." It is not clear from the language of the claim where the authentication takes place. Claims 2-18 and 20-36 are dependent from claims 1 and 19 respectively and are therefore rejected on the same basis as those claims.

Allowable Subject Matter

4. Claims 37-54 are allowed.
5. Claims 1 and 19 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action.

Art Unit: 2137

6. Claims 2-18 and 20-36 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

7. The following is a statement of reasons for the indication of allowable subject matter: The closest prior art in the field concerned with public-key modifications or extensions to the basic Kerberos protocol do not teach the features of the claimed invention of a (application) server initiating an authentication message exchange with a Key Distribution Server (KDC) with subsequent communication of a client with the KDC requesting a ticket to communicate with the (application) server. All in the manner of the applicant as found in the independent claims and disclosed in the Applicant's specification.
